LO-V
RUPTURE DISC

LO-V RUPTURE DISC

The unique Lo-V rupture disc is designed to relieve undesired pressure conditions in either a forward or reverse acting direction. Depending on how the holder is oriented, the Lo-V disc can perform the tasks of two different rupture discs and is designed to protect processing and storage tanks from implosion or over pressure conditions.

Rupture disc - LO-V

FEATURES AND BENEFITS

- Unique blade design offers superior opening and flow relief – patent pending.
- 1" water column minimum burst pressure.
- Hygienic and bolt-type configurations.
- Compatible with many competitive holder designs.
- Non-fragmenting.
- 3-A approved by independent auditors.
- Optional single-direction burst.

For more information about rupture disc specifications, contact the manufacturer's representative.
